Extension of the validity of a test report

Dear Madam or Sir,

in your order from 2022-09-13 you have asked for the extension of the validity of the test report 2018010301e for the product "Rasco 2K PMBC poly low shrinkage" (determination of the radon diffusion coefficient and the radon diffusion length of an insulating coating).

The method used for the test is in accordance with the procedure described in ISO/TS 11 665-13 (Measurement of radioactivity in the environment - Air: radon 222 - Part 13: Determination of the diffusion coefficient in waterproof materials: membrane two-side activity concentration test method; October 2017).

The manufacturer assured that the product was not technically modified since the above mentioned test. Therefore, the validity of the test report 2018010301e is extended indefinitely.

Best regards

Dr. J. Kemski
